PROFESSIONAL SUMMARY

Motivated and detail-oriented Junior Frontend Developer with a strong foundation in modern web technologies, including React, TypeScript, JavaScript (ES6+), and Tailwind CSS. Experienced in developing responsive, user-friendly web applications and integrating real-time backend functionality using Firebase. Highly passionate about clean code, performance optimization, and continuous self-learning through hands-on project creation and advanced web engineering platforms.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Style:	React, Tailwind CSS, Flexbox, CSS Grid, Responsive Web Design
Backend & Cloud:	Firebase (Authentication, Firestore, Hosting), Cloud AI Services
Developer Tools:	Git, GitHub, VS Code, Vercel Deployment, Command Line Interface

KEY PROJECTS

Premium Gym Management Dashboard [🔗 Live Demo](#)

Technologies: React, Tailwind CSS, JavaScript (ES6+), Firebase, HTML5, CSS3, Git

- Designed and developed a comprehensive management web application tailored for fitness centers.
- Implemented real-time backend synchronization using Firebase for data storage and user management.
- Created a fully responsive and intuitive user interface optimized for desktop and mobile viewports.

Full-Featured E-Commerce Platform [In Active Development](#)

Technologies: React, TypeScript, Tailwind CSS, Firebase, HTML5, CSS3, Git

- Architecting an end-to-end e-commerce store with dynamic product catalog display and state management.
- Integrating scalable store management features, including inventory display, ordering logic, and cart operations.
- Utilizing TypeScript to ensure type safety, robust code quality, and maintainable application structure.

EDUCATION

Secondary School Certificate — Computer Science & Engineering Track

2nd Baccalaureate Year | Egypt

SELF-STUDY & PRACTICAL TRAINING

Web Development & Scripting Track

Elzero Web School & W3Schools — Intensive practical coursework in HTML, CSS, JavaScript (ES6+), and modern web concepts.
